### PERSONAL PROFILE

I am a brilliant, motivated, meticulous thinker and a hardworking young man who seeks to make the society better with the little I can do in my power. I am a student of KNUST pursuing a degree in BSC. Computer Science. I desire to improve on what I already know and excel in every field regardless of the challenges. I have taken up varied roles and responsibilities in order to meet the already demanding standards within profession and study. The experience of working as a leader in church on campus and also being a student has put me up to task and has made me appreciate working under pressure and deliver my best, combining the burdens of other students with my own burdens. I can say for a fact that I am up to task. I have contributed to society in diverse ways, organizing classes for high school students in my neighborhood, mentoring junior students in the university through how they should engage academic work on campus.
